ARTICLE 1. PRODUCT POSITION

Dedicated Business Connection – is dedicated cable in client’s office with several separate phone lines. Connection End Point equipment in office can interface with office PBX via analog lines, digital channel (T1/E1) or VoIP channel – (SIP/H323).

This Business Connection suitable for

- legacy office PBX like Nortel Meridian/North start,
- hybrid PBX like NEC Elite, Panasonic TDA/TDE
- IP-PBX like Asterisk, PBXpress

Dedicated Business Connection can handle from 4 up to 16 voice channels (simultaneous calls) with rate level \$20-\$25 per channel and minimum installation charges at \$150 per whole connection.

Dedicated Business Connection provides call flow both ways (from-office and to-office) with full call attributes like CallerID and Name Display.

Dedicated Business Connection crates easy multiline environment for incoming to office calls – one incoming number with 16 lines.

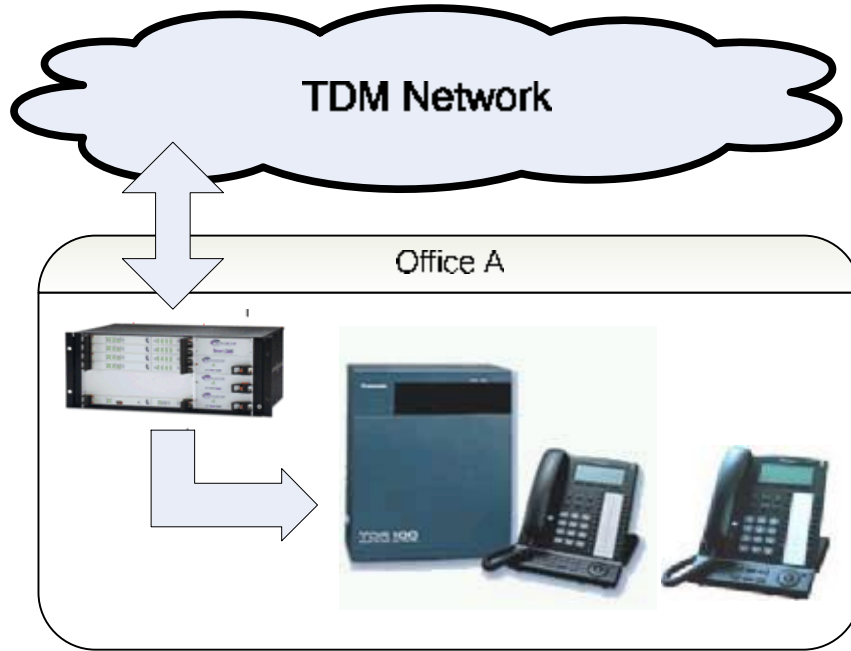

Dedicated Business Connection give you voice stability for any kind of office PBX.

Several Dedicated Business Connections can work as base for Unlimited Corporate Phone Network.

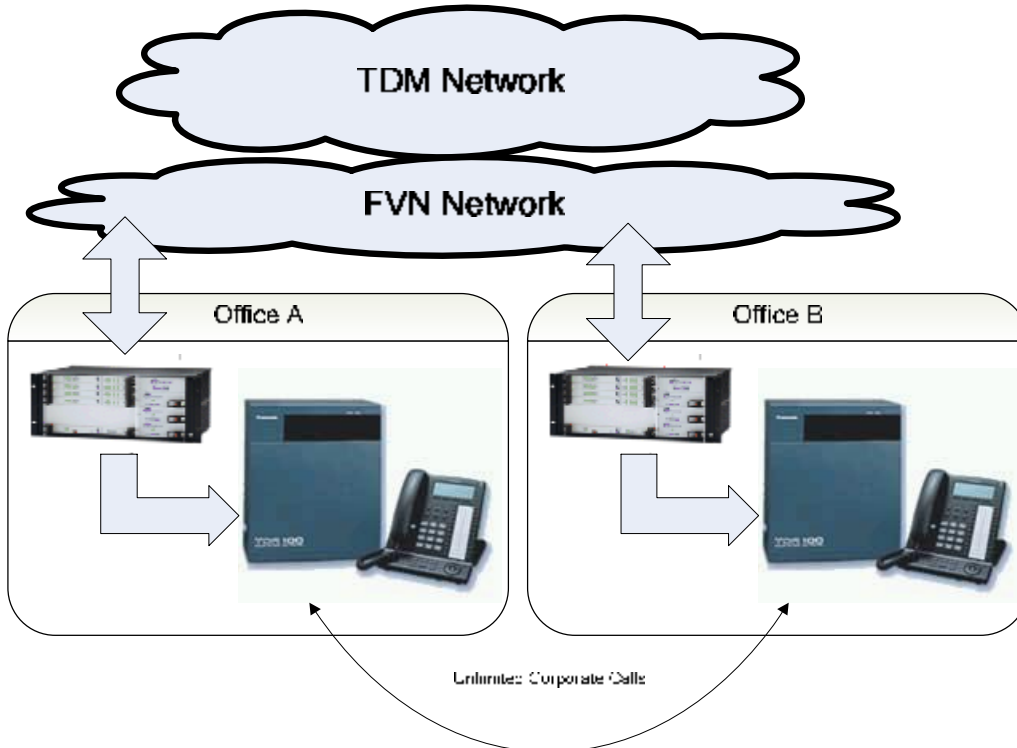

Each phone line will provide you with unlimited local and Toll Free calls (like your regular Bell phone). With additional charge local area can be expanded to whole Canada.

Business Lines will NOT support emergency calls (911).
